### **DETAILED ACTION**

The election filed May 5, 2006, has been received and entered.

Claims 1-15 are pending.

#### ***Election/Restrictions***

Applicant's election of Group II, claims 11-15, in the reply filed on May 5, 2006, is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 1-10 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

However, the applicant had not elected a single species from each of the species recited in claim 13, as required in the previous restriction requirement (see page 3). See discussion below.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

(a) the protease inhibitors capable of binding with a metalloprotease recited in claim 13;

Art Unit: 1651

(b) the protease inhibitors capable of binding with a cysteine protease recited in claim 13;

(c) the protease inhibitors capable of binding with a serine protease recited in claim 13.

Applicant is required, in reply to this action, to elect a single species, **from each of (a) through (c) above**, to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Thus, a proper election would appear as follows: --

Applicant hereby elects, also with traverse, bestatin for species (a), antipain for species (b), and TLCK for species (c).

--.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: claims 11, 12, 14, 15.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

Art Unit: 1651

Each of the metalloproteases and protease inhibitors has different properties and modes of action, and therefore do not share a common special technical feature.

**Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).**

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
